

COMPLIANCE ASSISTANCE MAINTENANCE PROGRAM CAMP

✓ *Help ensure fueling facility environmental regulatory compliance*

✓ *Prevent equipment failure through standardized maintenance practices*

✓ *Maximize facility uptime & minimize service costs*

CAMP is a cost effective, turn-key compliance management and preventative maintenance solution performed on a periodic basis by Henrich's expert technicians.

Poor Compliance Management can be Costly

Examples of Petroleum Bulk Storage DEC Average Fines...

Registration not current or valid	\$1,000
Spill in sump of fill port	\$5,000
Leak detection equipment not properly maintained	\$2,500
Failure to reconcile inventory	\$2,500
Insufficient monthly inspection reports	\$250
Fill ports not properly coded	\$100 / fill port
Failure to maintain secondary containment equipment	\$500

Henrich Can Help Reduce your Environment Risk

Experience Counts

We have made it our business to be the best at compliance management and preventative maintenance. Henrich has the expertise, staffing, information systems, relationships with regulators, and infrastructure to help ensure our client's fueling facilities are in compliance and running efficiently - and we can do so on a cost-effective basis.

WHAT CAMP INCLUDES:

- » Thorough site evaluations using compliance checklists
- » Determination of long term solutions to remedy any issues
- » Detailed summarization of all findings delivered to customer
- » Inspection of dispensers, sumps, hoses, nozzles, paperwork, etc.
- » Routine periodic maintenance, including:
 - *Changing of filters/strainers*
 - *Calibration of dispensers*
 - *Functionality testing on all leak detection equipment*
 - *Testing of any sensors, probes, and alarm systems*
 - *Check operation of shear valves, E-stops, overfills, vapor recovery systems, and more*
